
The top-quality compressor parts, equipment and service your business demands.
For 50 years, CMP Corporation has been delivering excellence that establishes us as a leader and a trusted supplier in the HVAC/R industry.

First, we’ve earned a reputation as the go-to source for compressor parts. That distinction comes from having the world’s largest inventory of the highest-quality parts for every major brand, all backed by incredibly fast service. With special high-tech processing to fill requests quickly and accurately, most orders ship the same day. For CMP customers, that fast response time means less downtime.

In addition to unmatched parts selection and delivery speed, CMP is known for outstanding quality. We design and craft parts to meet or exceed the highest industry benchmarks.

Those same great parts enable us to produce remanufactured OEM-quality compressors economically. Using an exclusive re-engineering process and new CMP parts to upgrade worn components, we create remanufactured units with the reliable performance of new OEM compressors, but at much lower prices. Our remanufactured models even include the longest warranties available.

Worldwide Influence

CMP is a global force in the HVAC/R industry, serving many customers in the Far East, Middle East and other regions. Our fast and versatile service teams, combined with made in the U.S.A. parts, make CMP ideal for international partnerships.

Unique Capabilities

- CMP’s expert technicians provide timely, innovative solutions to unique cooling situations, and we’re honored that our customers award us the industry’s top ratings for service and support.
- With over 160,000 square feet of in-house manufacturing, CMP is able to custom-make replacement parts for unusual applications, even for out-of-production units.
Original Equipment Manufacturers

CMP enjoys long-standing, mutually productive relationships as a trusted parts supplier for industry-leading compressor manufacturers. We pride ourselves on consistently being able to design, produce and deliver the best parts for your compressors, especially in critical situations or unexpected challenges. Look to CMP when you need low volume components that no longer fit within your manufacturing strategic plan.

Corporate Refrigeration Accounts

CMP provides vital support for your network of facilities. We understand your essential equipment requirements and priorities, and we’re responsive to what you need to avoid downtime. We help customers maximize productivity and performance of their cooling equipment by delivering dependable re-engineered compressors, parts and expert service. We’re committed to enhancing your brand’s image and your company’s profitability.

Compressor Remanufacturers

CMP works with the industry’s best compressor remanufacturers, and we truly value our role as a supply partner. We want our customers to continue to rely on CMP for our huge inventory and fast delivery of OEM-quality parts for remanufactured compressors -- even when that calls for custom manufacturing of replacements for discontinued parts. We’re also a perfect back-up resource when you have overflow work that your shops can’t get to.

Distributors/Wholesalers

When the success of your business rides on providing your customers with the cooling equipment and systems they need right away, it will be comforting to know that CMP has your back – plus your compressor parts, your remanufactured units and a great service team. Regardless of which HVAC/R brands you carry, you can count on CMP for quality and prompt delivery of whatever you need, as cost-effectively as possible.
Taking HVAC/R farther.

CMP is uniquely positioned to make your job easier and to optimize the performance of the cooling equipment you make, use or sell. However you measure it, partnering with CMP is a smart move and a great ROI.

We'll help you eliminate costly downtime and any worry about replacement part failure. Thanks to CMP's speed, quality and expertise, you're assured of receiving the right components and solutions as quickly as possible, resulting in maximum productivity and cost-savings. That also adds up to valuable protection of your company’s reputation.
